Because your garden should be a place to escape to not from!

Client:

Job site:

Report Date:

Purpose:

Redo planting behind newly refinished pool

Want dense evergreen shrubs with some color

Conditions/Assumptions

- Full sun
- About 100' long overall - 36'x 12-13' deep behind pool and 3-5' deep for the rest

Recommendations

1. Along back wall alternate between

- a. broadleaf evergreen shrub with some color in the leaves such as Photinea fraseri (planted no less than 10' on center to keep distinct) these can handle being hedged or left to grow naturally
 - b. an blooming vine (ideally evergreen) such as honeysuckle or star jasmine (or pink jasmine) on wooden or wire trellis attached to the wall
2. In the corners, I suggest planting multi trunk Crepe Myrtles as well as one in the middle (2 bracketing the area)

behind the pool and one more in the far corner.)

3. In the narrow area I suggest planting in the foreground of the vines with Blanket Flower (Gailardia)
4. Behind the pool and in wider areas fill in with
 - a. Carpet Roses- in yellow and (scarlet if more red desired) (10-12)
 - b. Euphorbia - Cushion Spurge, Variegated and purple leafed (6-8)
 - c. Eucomis Sparkling Burgundy - Pineapple Lily (an

Because your garden should be a place to escape to not from!

alternative would be the Phormium Black Adder) (7-10)

5. In the arrow area between the new patio and the wall in the northwest corner continue the vines with Dwarf Escalonia or Nandina in between (3-4 5G)- these will fill the space without getting too big and overtake the patio.

6. In the area by the master Bedroom – I recommend another Crepe Myrtle (Tree form) to add some color closer to the house.- underplant with evergreen reblooming Day Lilies (4) and Dwarf Germander (2-3)
7. The inset by the pool plant with some long blooming Blanket Flower (3) and Dwarf Germander (1)
8. Patio inset between the doors with existing fountain- add 3-4 " of good planting soil- Dwarf Germander (2) with either evergreen reblooming Daylilies or blanket flower (4-6)
 - a. Another option here is to plant a mix of Lavender and Thyme to go with the Mediterranean theme of the fountain.

9. In the corner between the new patio and the sport court – Plant a Japanese Maple. (Lionshead variety or another Fireglow)

Fill Ir

925 337 0433 FAX: 925 373 9040
vvmdesigns@comcast.net

Botanical Name: *Acer palmatum* 'Shishigashira'

Common Name: Japanese Maple

Plant Type: Tree Shrub

Habit: Broad Horizontal Irregular

Plant Size: 1-3' 3-6' 6-12' 12-25' 25-40'

Leaf Color: Dark green Green Light

Flower Color: Green White

Flower Season: Spring

Sun: Full sun Half sun Shade

Water: Medium water Extra summer water

Soil Type: Sandy soil Loam soil Average soil Rich soil Well-drained soil Acid pH

This magnificent plant can be used as a small tree or shrub. It is deciduous with graceful leaves which have a scarlet color in spring as it leafs out. They turn orange or yellow in fall. It is slow growing to 20', and requires shelter from hot winds.

Botanical Name: *Lagerstroemia* 'Catawba'

Common Name: Catawba Crepe Myrtle

Plant Type: Tree

Habit: Arching Broad Upright

Plant Size: 6-12'

Leaf Color: Green Light green

Flower Color: Purple

Flower Season: Summer

Sun: Full sun

Water: Drought tolerant Light water

Soil Type: All soils Average soil Rich soil Well-drained soil Moist soil Neutral pH

The Catawba Crepe Myrtle Trees have very unique, two-toned purple blooms. Mature size: 10 feet high and wide. The leaves are deciduous green and turn to orange, red, and yellow in the fall. The pollen anthers of the Catawba Crepe Myrtle Tree are bright yellow and contrast well among the pink, purple,

Botanical Name: *Correa* 'Wyn's Wonder'

Common Name: Variegated Australian Fuchsia

Plant Type: Shrub Ground cover

Habit: Mound

Plant Size: 1-3'

Leaf Color: Green Grey green

Flower Color: Pink

Flower Season: Winter Spring

Sun: Full sun Half sun

Water: Light water

Soil Type: All soils Average soil Poor soil Well-drained soil Neutral pH

This dense growing evergreen shrub grows to 2-3 feet tall by 3-5 feet wide and has very attractive olive green leaves that have strong creamy colored margins.

In the fall, they appear the one inch long rose-pink flowers that flare out at the tips to display their soft pink interior.

Botanical Name: *Escallonia* 'Newport Dwarf'

Common Name: Dwarf Escallonia

Plant Type: Shrub

Habit: Round

Plant Size: 1-3'

Leaf Color: Dark green

Flower Color: Pink Red

Flower Season: Intermittent

Sun: Full sun Half sun

Water: Light water

Soil Type: Loam soil Average soil Well-drained soil Neutral pH

Escallonia 'Newport Dwarf' is an evergreen shrub with glossy leaves. Grows 2.5 ft. tall and 4 ft. wide, with deep pink to red flowers in summer and fall.

Botanical Name: Lagerstroemia 'Dynamite'

Common Name: Dynamite Crape Myrtle

Plant Type: Tree Shrub

Habit: Arching Broad Upright

Plant Size: 6-12' 12-25' 25-40'

Leaf Color: Green Light green

Flower Color: Red

Flower Season: Summer

Sun: Full sun

Water: Drought tolerant Light water

Soil Type: All soils Average soil Rich soil Well-drained soil Acid pH Neutral pH

Developed to produce brightest red bloom

pest and disease resistant

highly drought tolerant

blooms last a full 120 days

Botanical Name: Lagerstroemia indica 'Cherokee'

Common Name: Cherokee Crape Myrtle

Plant Type: Tree Shrub

Habit: Arching Broad Upright

Plant Size: 6-12'

Leaf Color: Green Light green

Flower Color: Red

Flower Season: Summer

Sun: Full sun

Water: Drought tolerant Light water

Soil Type: All soils Average soil Rich soil Well-drained soil Acid pH Neutral pH

Hybrid (indica x fauriei)

13-20 feet Upright round crown multistemmed small tree

medium red bloom Mature size: 7-8 feet high and wide

Selected for: compact deciduous shrub with bright red flower clusters and brilliant

Botanical Name: Nandina domestica 'Atropurpurea Nana '

Common Name: Dwarf Heavenly Bamboo

Plant Type: Shrub

Habit: Mound

Plant Size: Under 1'

Leaf Color: Green Bronze

Flower Color: White

Flower Season: Spring Summer

Sun: Full sun Half sun

Water: Medium water

Soil Type: All soils Average soil Neutral pH

The 'Compacta Nana' is a small, rounded shrub that grows from 12-15" high. Its growth habit is dense, and the leaves become bright red in color in cold, winter areas. It can receive sun to part shade, and is used well as an accent plant.

Botanical Name: Phormium 'Black Adder'

Common Name: New Zealand Flax

Plant Type: Shrub Grass

Habit: Arching

Plant Size: 3-6'

Leaf Color: Bronze Purple

Flower Color: n/a

Flower Season: Summer

Sun: Full sun Half sun

Water: Light water

Soil Type: All soils Poor soil Neutral pH

Black New Zealand Flax - Perennial to 3-4' tall w/ arching dark maroon to black foliage.

Sun/Light shade. Low-moderate water. Hardy to 15-20 F. Propagation Prohibited.

lustrous slightly glossy dark blackish purple upright leaves grow slowly upwards to 3 or 4 feet tall and arch over near the tips

Botanical Name: Photinia x fraseri

Common Name: Fraser Photinia

Plant Type: Shrub

Habit: Broad Mound Upright

Plant Size: 6-12'

Leaf Color: Dark green Red

Flower Color: White

Flower Season: Spring

Sun: Full sun Half sun

Water: Drought tolerant Light water Medium water

Soil Type: Loam soil Average soil Rich soil Well-drained soil Neutral pH

The Photinia fraseri is an evergreen, medium-sized shrub with new foliage that is a glistening copper red color. It is excellent as a hedge, screen, or accent plant. It should be grown under conditions of sun.

Botanical Name: Rosa "Flower Carpet" scarlet

Common Name: "Flower Carpet" Groundcover rose

Plant Type: Shrub Ground cover

Habit:

Plant Size: 1-3'

Leaf Color: Green

Flower Color: Orange Red

Flower Season: Spring Summer Fall

Sun: Full sun

Water: Light water Medium water

Soil Type: Loam soil Rich soil Well-drained soil Acid pH Neutral pH

Groundcover roses very hardy and easy to maintain As its name implies it makes a virtual carpet of flowers in the garden.

Its blooms are produced with abandon on a compact densely foliated bush with shiny, light

Botanical Name: Rosa "Flower Carpet" yellow

Common Name: "Flower Carpet" Groundcover rose

Plant Type: Shrub Ground cover

Habit:

Plant Size: 1-3'

Leaf Color: Green

Flower Color: Yellow

Flower Season: Spring Summer Fall

Sun: Full sun

Water: Light water Medium water

Soil Type: Loam soil Rich soil Well-drained soil Acid pH Neutral pH

Groundcover roses very hardy and easy to maintain As its name implies it makes a virtual carpet of flowers in the garden.

Its blooms are produced with abandon on a compact densely foliated bush with shiny, light

Botanical Name: Teucrium chamaedrys 'Prostratum'

Common Name: Prostrate Germander

Plant Type: Shrub Ground cover

Habit: Mound Prostrate

Plant Size: Under 1'

Leaf Color: Dark green

Flower Color: Lavender

Flower Season: Spring Summer

Sun: Full sun Half sun Shade

Water: Drought tolerant Medium water

Soil Type: All soils Average soil Well-drained soil Neutral pH

Low growing dense mounding perennial to 1' tall by 2-3' wide. Dark green foliage is well accented by lavender flowers in spring and summer. Prune in late winter to revitalize foliage and maintain appearance. Mediterranean native. Bee attractor. Very hardy, moderate drought tolerance. Will decline in soggy soil.

Habit: Mound Upright

Plant Size: 1-3' 3-6'

Leaf Color: Blue green

Flower Color: Green Yellow

Flower Season: Winter Spring

Sun: Full sun Half sun

Water: Drought tolerant Light water

Soil Type: All soils Average soil Well-drained soil Neutral pH

Broad clusters of yellow flowers grow from this evergreen perennial. Its upright stems form a 4' tall dome-shaped bush. Crowded all along the stems are narrow, blue-green leaves. It is fairly tolerant to droughts. In the late winter and early spring, its clustered flowers make dense, round to cylindrical masses. Until the seeds ripen, the color holds with only slight

Botanical Name: *Euphorbia polychroma*

Common Name: Cushion Spurge

Plant Type: Perennial

Habit: Broad Mound

Plant Size:

Leaf Color: Green

Flower Color: Yellow

Flower Season: Spring

Sun: Full sun

Water: Drought tolerant

Soil Type: Sandy soil Rocky soil Average soil Poor soil Well-drained soil Dry soil

Standing 18-24", this U.S. Native has oblong leaves linear to fanceolate 5/8" long and showy yellow bracts in early spring.

Botanical Name: *Gaillardia grandiflora 'Goblin'*

Common Name: Goblin Blanketflower

Plant Type: Perennial

Habit: Mound Upright

Plant Size: 1-3'

Leaf Color: Green

Flower Color: Gold Red Yellow

Flower Season: Summer

Sun: Full sun

Water: Drought tolerant Light water Extra summer water

Soil Type: Sandy soil Loam soil Average soil Well-drained soil Neutral pH

Goblin Blanketflower is a perennial. Grows to 1 ft. tall, 1.5 ft. wide, with roughish gray-green foliage and single or double flowers 3-4 in. across. Large deep red flowers bordered in bright yellow. Exceptionally long bloom.

Botanical Name: *Hemerocallis 'Acapulco Night'*

Common Name: Acapulco Night Daylily Re Ev

Plant Type: Ground cover Perennial

Habit: Upright

Plant Size: 1-3'

Leaf Color: Green
